

Coronavirus COVID-19 Status of Operations

March 23rd 2020 Update

Dear Valued Customers,

Following up our last communication, we would like to update you about the current situation.

Our Government has tightened even more the restrictions all over our National Territory to prevent COVID-19 contaminations. Due to this, all not “essential” businesses have to shut down the operations and close the manufacturing.

“Chemical Products Manufacturing” and “Equipment for Chemical Processing Manufacturing” categories are reputed to be essential by our Government. The DEMAK GROUP, in all its companies, is listed under these categories.

According to this, all our productions, remote technical services and spare parts shipment are fully operating.

For Technical Assistance, you can always refer to our email address service@demak.it
Our technical team will promptly reply you.

Our foreign plants, Demak America and Demak South America, are fully operating too, guaranteeing products and spare parts to the market as in normal operations.

Demak Group Staff keeps on following rules in health and hygiene strictly, as already announced in previous communications. In addition to this, all our departments are subjected to smart working and shifts accordingly, in order to safeguard our employees' health.

In a full spirit of transparency and professionalism, we will keep on sending you regular updates according to the development of the situation.

Demak Group
