

## **Coronavirus COVID-19 – Status of Supply Chains March 10<sup>th</sup> 2020 Update**

Dear Valued Customer,

Following up our last communication, we would like to update you about the current situation in compliance with the latest Ministry of Health Decree.

Italy has been declared this morning as “Red Zone”.

Please consider that even companies in the red zone are regularly working and the goods are moved in and out without problems or limitation.

### **Demak and S.E. Special Engines activities and production are fully operating.**

We reached out all our raw material suppliers and confirm that they are all regularly working and can support us with the production.

Nevertheless, we are anyway increasing our stocks as additional warranty to you to grant an even better service.

There are not problems in freight traffics and therefore we are able grant the shipment of material regularly as has always been.

Demakgroup Staff is still strictly following rules in health and hygiene, as already announced in our previous communication.

In a full spirit of transparency and professionalism, we will keep on sending you regular updates according to the development of the situation.

Demakgroup  
The Management
